

32-5747: Mouse Anti Human Granulocyte Colony Stimulating Factor(Clone:NYRhGCSF.)

Clonality :	Monoclonal
Clone Name :	NYRhGCSF.
Application :	ELISA,WB,IP
Gene :	CSF3
Gene ID :	1440
Uniprot ID :	P09919
Format :	Purified
Alternative Name :	CSF-3,MGI-1G,GM-CSF beta,Pluripoietin,Filgrastim,Lenograstim,G-CSF,MGC45931,GCSF.
Isotype :	Mouse IgG.
Immunogen Information :	r.Human G-CSF.

Description

GCSF is a cytokine that controls the production, differentiation, and function of granulocytes. The active protein is found extracellularly. Three transcript variants encoding three different isoforms have been found for this gene. Granulocyte/macrophage colony-stimulating factors are cytokines that act in hematopoiesis by controlling the production, differentiation, and function of 2 related white cell populations of the blood, the granulocytes and the monocytes-macrophages. This csf induces granulocytes.

Product Info

Amount :	1 mg
Purification :	Protein A.
Content :	1mg/ml in PBS (after reconstitution).
Storage condition :	In lyophilized form, for long periods, store at 4°C in a dry environment. After reconstitution, if not intended for use within a month, aliquot and store at -20°C.

Application Note

Direct ELISA, Western Blot, Immunoprecipitation.
