

32-5925: Polyclonal Rabbit Anti Trichomonas Vaginalis P65

Clonality : Polyclonal

Format : Purified

Isotype : Rabbit IgG

Description

Trichomonas vaginalis, an anaerobic, flagellated protozoan parasite, is most dominant protozoan causing sexual transmitted disease. T. vaginalis induced vaginal tract infection occurs as multiple steps involving interactions between host macromolecules and protozoan virulent factor. Adhesion protein P65 of T. vaginalis has a vital part in assisting the penetration into vaginal tract surface.

Product Info

Amount : 0.5 mg

Content : 100mg glycine, pH8.0.

Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
