## 11-10040: Polyclonal Antibody to Twistnb

Clonality: Polyclonal

WB Application: Reactivity: Human **TWISTNB** Gene: Gene ID: 221830 **Uniprot ID:** Q3B726 Format: Purified **Alternative Name: TWISTNB** Isotype: Rabbit IgG

Immunogen Information: A partial length recombinant Twistnb protein (amino acids 28-257) was used as the immunogen for

this antibody.

## **Description**

Twistnb is a DNA-dependent RNA polymerase that catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Component of RNA polymerase I which synthesizes ribosomal RNA precursors through its association with RRN3/TIF-IA may be involved in recruitment of Pol I to rDNA promoters. This protein contains 2 potential nuclear localization signals in the C terminus and shares 72% sequence identity with the mouse orthologs. Twistnb has highest expression in fetal lung, liver, and kidney, and low expression in all adult tissues.
