

## 32-2500: LCN2 Pichia Recombinant Protein

**Alternative Name :** Neutrophil gelatinase-associated lipocalin,NGAL,p25,25 kDa alpha-2-microglobulin-related subunit of MMP-9,Lipocalin-2,Oncogene 24p3,LCN2.

### Description

Source : Pichia pastoris. Neutrophil Gelatinase Associated Lipocalin Human Recombinant is expressed in Pichia pastoris having a molecular weight of approximately 21kDa.The LCN2 is purified by proprietary chromatographic techniques. Recombinant Human Lipocalin-2 also called Neutrophil Gelatinase Associated Lipocalin (NGAL) belongs to a family of lipocans which include 25 proteins (including a1-microglobulin and b-lactoglobulin), which are characterized by their ability to bind small lipophilic substances in their hydrophobic core.They thereby serve as transporters of substances like retinal, biliverdins & prostaglandins. There are indications that NGAL is involved in modulation of the inflammatory response and is found in the plasma of patients after stroke.

### Product Info

**Amount :** 20 µg  
**Purification :** Greater than 96% as determined by SDS-PAGE.  
**Content :** LCN2 was lyophilized from 0.02M NH<sub>4</sub>HCO<sub>3</sub>.  
**Storage condition :** Lyophilized LCN2 although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution LCN2 should be stored at 4°C between 2-7 days and for future use below -18°C.For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Please prevent freeze-thaw cycles.

### Application Note

It is recommended to reconstitute the lyophilized LCN2 in sterile 18MΩ-cm H<sub>2</sub>O not less than 100µg/ml, which can then be further diluted to other aqueous solutions.
