

32-2586: NDUFA2 Recombinant Protein

Alternative Name : NADH dehydrogenase [ubiquinone] 1 alpha subcomplex subunit 2,Complex I-B8,C1-B8,NADH-ubiquinone oxidoreductase B8 subunit,NDUFA2,CD14,CIB8.

Description

Source : Escherichia Coli. NDUFA2 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 122 amino acids (1-99) and having a molecular mass of 13.3kDa. NDUFA2 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. NADH dehydrogenase [ubiquinone] 1 alpha subcomplex subunit 5 (NDUFA5) is a member of the complex I NDUFA5 subunit family. The human NDUFA5 gene codes for the B13 subunit of complex I of the respiratory chain that transfers electrons from NADH to ubiquinone. The NDUFA5 protein localizes to the inner mitochondrial membrane as part of the seven component-containing, water soluble 'iron-sulfur protein' (IP) fraction of complex I, even though its exact role is undetermined.

Product Info

Amount : 10 µg
Purification : Greater than 95.0% as determined by SDS-PAGE.
Content : The NDUFA2 solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 0.15M NaCl, 10% glycerol and 1mM DTT.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
