## 32-2931: YARS Recombinant Protein

Alternative Name : Tyrosyl-tRNA synthetase cytoplasmic,Tyrosyl--tRNA ligase,TyrRS,YARS,YRS,YTS,CMTDIC.

## Description

Source : Escherichia Coli. YARS produced in E.Coli is a single, non-glycosylated polypeptide chain containing 548 amino acids (1-528 a.a.) and having a molecular mass of 61.3 kDa . YARS is fused to a 20 amino acid His-tag at N -terminus \& purified by proprietary chromatographic techniques. Tyrosyl-tRNA synthetase (YARS) is a member of the class I tRNA synthetase family. YARS is a vital enzyme which catalyzes the aminoacylation of tRNATrp with tryptophan, a critical function of the cell's protein synthesis machinery. Expression of YARS is highly stimulated in human cells by the addition of IFN-gamma.
