32-3138: YWHAG His Recombinant Protein

Alternative Name: 14-3-3 protein gamma,Protein kinase C inhibitor protein 1,KCIP-1,YWHAG,Tyrosine 3-monooxygenase/tryptophan 5-monooxygenase activation protein,gamma polypeptide.

Description

Source: Escherichia Coli. YWHAG Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 246 amino acids (2-247) and having a molecular mass of 36 kDa. YWHAG is fused to His Tag and purified by proprietary chromatographic techniques. The 14-3-3 family of proteins plays a key regulatory role in signal transduction, checkpoint control, apoptotic and nutrient-sensing pathways. 14-3-3 proteins are highly conserved and ubiquitously expressed. There are at least seven isoforms that have been identified in mammals. The 14-3-3gamma, a subtype of the 14-3-3 family of proteins, was thought to be brain and neuron-specific. It has been shown to interact with RAF1 and protein kinase C, proteins involved in various signal transduction pathways.

Product Info

Amount: 10 µg

Purification: Greater than 95.0% as determined by SDS-PAGE. Content: YWHAG solution containing 1x PBS and 50% glycerol.

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of Storage condition:

time. Avoid multiple freeze-thaw cycles.
