

32-3325: BEST1 Recombinant Protein

Alternative Name : Bestrophin-1, TU15B, Vitelliform macular dystrophy protein 2, BEST1, VMD2, ARB, BEST, BMD, RP50, TU15B, Bestrophin-1 isoform 1, Bestrophin 1.

Description

Source : Escherichia Coli. BEST1 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 317 amino acids (292-585) and having a molecular mass of 36 kDa. BEST1 is fused to a 23 amino acid His-Tag at N-terminus and purified by proprietary chromatographic techniques. Bestrophin 1 (BEST1) is a part of the bestrophin gene family and is also forms calcium-activated chloride-ion channels in epithelial. This small gene family is characterized by proteins with a highly conserved N-terminus with 4-6 transmembrane domains. BEST1 is extremely permeable to bicarbonate.

Product Info

Amount : 20 µg
Purification : Greater than 90.0% as determined by SDS-PAGE.
Content : The BEST1 solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 0.4M Urea and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
