## 32-4541: Recombinant Human Pentraxin-3

#### Abstract

Alternative TSG-14,TNFAIP5,PTX3,Pentraxin-related protein PTX3,Pentaxin-related protein PTX3,Tumor necrosis Name : factor-inducible gene 14 protein,TSG14,pentraxin-related gene rapidly induced by IL-1 beta.

## Description

Source : Escherichia Coli. Recombinant Human PTX3 produced in E.Coli is a single, non-glycosylated polypeptide chain containing 401 amino acids (18-381 a.a) and having a molecular mass of 44.4 kDa . PTX3 is fused to a 36 amino acid His Tag at N -terminus and purified by proprietary chromatographic techniques. PTX3 is part of the pentraxin family sharing the C-terminal domain with short pentraxins and containing a unique N -terminal domain. PTX3 is produced and released at inflammatory sites by various cell types including monocytes/macrophages, endothelial cells, vascular smooth muscle cells, fibroblasts, and adipocytes. PTX3 is involved in the regulation of innate resistance to pathogens, inflammatory reactions, possibly clearance of self-components and female fertility. PTX3 is used as a marker for disease activity of psoriasis. High serum PTX3 levels are associated with the disease severity of systemic sclerosis. Elevated serum PTX3 is associated with pulmonary fungal infections.

## Product Info

| Amount : | $20 \mu \mathrm{~g}$ |
| :--- | :--- |
| Purification : | Greater than $90 \%$ as determined by Analysis by SDS-PAGE. |
| Content : | The PTX3 protein contains 20 mM Tris- HCl buffer $\mathrm{pH}-8.5,1 \mathrm{mM}$ DTT and $10 \%$ glycerol. |
| Storage condition : | Store at $4^{\circ} \mathrm{C}$ if entire vial will be used within $2-4$ weeks. Store, frozen at $-20^{\circ} \mathrm{C}$ for longer periods of <br> time. For long term storage it is recommended to add a carrier protein $(0.1 \%$ HSA or BSA). Avoid <br> multiple freeze-thaw cycles. |
