32-5133: Recombinant Single Chain Cardiac Troponin I-C 2nd generation

Alternative

Troponin I cardiac muscle, Cardiac troponin

Name:

I,TNNI3,TNNC1,CMH7,RCM1,cTnI,CMD2A,MGC116817,Troponin C slow skeletal and cardiac muscles,TN-

C,TNNC1,TNNC,TNC,CMD1Z.

Description

Source: Escherichia Coli. Recombinant Single Chain Cardiac Troponin I-C 2nd generation produced in E.Coli is a single, nonglycosylated, polypeptide chain (aa28-110-Linker-cTnC), having a molecular weight of 30kDa.1mg of scIC2 is equivalent to 0.82mg of full length human cardiac TNI on a molar basis. The scIC2 is purified by proprietary chromatographic techniques. Troponin Complex is a heteromeric protein playing an important role in the regulation of skeletal and cardiac muscle contraction. It consists of three subunits, Troponin I, Troponin T and TroponinC. Each subunit is responsible for part of Troponin Complex function. E.g. Troponin I inhibits ATP-ase activity of acto-myosin. Troponin T and Troponin I are presented in cardiac muscles in different forms than in skeletal muscles. Purified subunits of rcTnI, rcTnC and rcTnT are recomplexed in vitro under appropriate conditions.

Product Info

Amount: 10 µg

Greater than 91.0% as determined by SDS-PAGE. Purification:

The protein solution contains 20mM Tris-HCl, 250mM NaCl and 50% glycerol, pH 7.5. Content:

scIC2 although stable at 10°C for 7 days, should be stored below -18°C. Please prevent freeze-Storage condition:

thaw cycles.
