32-5372: Recombinant SARS Associated Coronavirus Envelope

Description

Source: The E.coli derived 34 kDa recombinant protein contains the N-terminus Enevelope protein 1-76 amino acids immunodominant regions. SARS Coronavirus is an enveloped virus containing three outer structural proteins, namely the membrane (M), envelope (E), and spike (S) proteins. Spike (S)-glycoprotein of the virus interacts with a cellular receptor and mediates membrane fusion to allow viral entry into susceptible target cells. Accordingly, S-protein plays an important role in virus infection cycle and is the primary target of neutralizing antibodies.

Product Info

Amount : $100 \mu g / 0.5 mg$

Purification: SARS Envelope protein is >95% pure as determined by 10% PAGE(coomassie staining).

Content: 50mM Tris-HCl, 60mM NaCl, and 50% glycerol.

Storage condition: SARS Envelope Protein is shipped at ambient temperature. Upon arrival, store at -20C.
