

## 32-5747: Mouse Anti Human Granulocyte Colony Stimulating Factor(Clone:NYRhGCSF.)

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	NYRhGCSF.
<b>Application :</b>	ELISA,WB,IP
<b>Gene :</b>	CSF3
<b>Gene ID :</b>	1440
<b>Uniprot ID :</b>	P09919
<b>Format :</b>	Purified
<b>Alternative Name :</b>	CSF-3,MGI-1G,GM-CSF beta,Pluripoietin,Filgrastim,Lenograstim,G-CSF,MGC45931,GCSF.
<b>Isotype :</b>	Mouse IgG.
<b>Immunogen Information :</b>	r.Human G-CSF.

### Description

GCSF is a cytokine that controls the production, differentiation, and function of granulocytes. The active protein is found extracellularly. Three transcript variants encoding three different isoforms have been found for this gene. Granulocyte/macrophage colony-stimulating factors are cytokines that act in hematopoiesis by controlling the production, differentiation, and function of 2 related white cell populations of the blood, the granulocytes and the monocytes-macrophages. This csf induces granulocytes.

### Product Info

<b>Amount :</b>	1 mg
<b>Purification :</b>	Protein A.
<b>Content :</b>	1mg/ml in PBS (after reconstitution).
<b>Storage condition :</b>	In lyophilized form, for long periods, store at 4°C in a dry environment. After reconstitution, if not intended for use within a month, aliquot and store at -20°C.

### Application Note

Direct ELISA, Western Blot, Immunoprecipitation.
