36-1447: Monoclonal Antibody to MUC1 / EMA / CD227 (Epithelial Marker)(Clone: GP1.4)

Clonality: Monoclonal GP1.4 Clone Name: Application: WB.IHC Reactivity: Human Gene: MUC1 Gene ID: 4582 **Uniprot ID:** P15941 Format: Purified

Isotype: Mouse IgG1, kappa

Immunogen Information: Human milk fat globule membranes

MUC1,PUM

Description

Alternative Name:

In Western blotting, it recognizes proteins in MW range of 265-400kDa, identified as different glycoforms of EMA. This MAb reacts with the DTRP epitope in the tandem repeats. The α subunit has cell adhesive properties. It can act both as an adhesion and an anti-adhesion protein. EMA may provide a protective layer on epithelial cells against bacterial and enzyme attack. The β subunit contains a C-terminal domain, which is involved in cell signaling, through phosphorylations and protein-protein interactions. In immunohistochemical assays, it superbly stains routine formalin/paraffin carcinoma tissues. Antibody to EMA is useful as a pan-epithelial marker for detecting early metastatic loci of carcinoma in bone marrow or liver.

Product Info

Amount: 100 µg

Purification: Affinity Chromatography

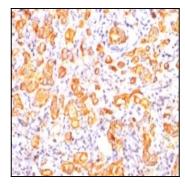

100 µg in 500 µl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly Content:

Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid Storage condition:

repeated freeze and thaw cycles.

Application Note

Western Blot (1-2ug/ml); ,Immunohistology (Formalin-fixed) (0.5-1.0ug/ml for 30 min at RT),(Staining of formalin-fixed tissues requires boiling tissue sections in 10mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes),

Formalin-fixed, paraffin-embedded human Breast Carcinoma stained with EMA Monoclonal Antibody (GP1.4).
