

36-1563: Monoclonal Antibody to Cytochrome C (Mitochondrial Marker)(Clone : CTC05)

| Clonality : | Monoclonal |
|-------------------------|----------------------------------|
| Clone Name : | CTC05 |
| Application : | WB,FACS,IHC |
| Reactivity : | Human, Mouse, Rat |
| Gene : | CYCS |
| Gene ID : | 54205 |
| Uniprot ID : | P99999 |
| Format : | Purified |
| Alternative Name : | CYCS,CYC |
| Isotype : | Mouse IgG2b, kappa |
| Immunogen Information : | Recombinant cytochrome c protein |

Description

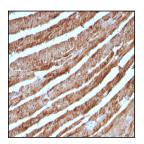

Cytochrome C is a well-characterized mobile electron transport protein that is essential to energy conversion in all aerobic organisms. In mammalian cells, this highly conserved protein is normally localized to the mitochondrial inter-membrane space. More recent studies have identified cytosolic cytochrome c as a factor necessary for activation of apoptosis. During apoptosis, cytochrome c is trans-located from the mitochondrial membrane to the cytosol, where it is required for activation of caspase-3 (CPP32). Overexpression of Bcl-2 has been shown to prevent the translocation of cytochrome c, thereby blocking the apoptotic process. Overexpression of Bax has been shown to induce the release of cytochrome c and to induce cell death. The release of cytochrome c from the mitochondria is thought to trigger an apoptotic cascade, whereby Apaf-1 binds to Apaf-3 (caspase-9) in a cytochrome c-dependent manner, leading to caspase-9 cleavage of caspase-3.

Product Info

| Amount : | 100 µg |
|---------------------|---|
| Purification : | Affinity Chromatography |
| Content : | 100 μg in 500 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly toxic. |
| Storage condition : | Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid repeated freeze and thaw cycles. |

Application Note

Western Blot (1-2ug/ml); Flow Cytometry (1-2ug/million cells); Immunohistochemistry (Formalin-fixed) (0.25-0.5ug/ml for 30 minutes at RT)(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes);

Formalin-fixed, paraffin-embedded Human Heart stained with Cytochrome C Monoclonal Antibody (CTC05).

For Research Use Only. Not for use in diagnostic/therapeutics procedures.
