

ABG1128: Anti-GFP-Tag Mouse mAb

Clonality : Monoclonal
Application : IP, WB
Isotype : IgG1
Immunogen Information : Recombinant Protein

Description

The green fluorescent protein (GFP) is a protein composed of 238 amino acid residues (26.9kDa) that exhibits bright green fluorescence when exposed to light in the blue to ultraviolet range. In cell and molecular biology, the GFP gene is frequently used as a reporter of expression.

Product Info

Amount : 100 µg
Content : 1mg/ml. PBS with 0.02% sodium azide and 50% glycerol pH 7.4.
Storage condition : Store at -20°C. Avoid repeated freeze-thaw cycles.

Application Note

WB 1:5,000 IP 1:200
