32-1574: oLeptin tA Recombinant Protein

Description

Source: Escherichia coli.

Product Info

Amount: 50 μg

Purification: Greater than 98.0% as determined by:(a) Gel filtration analysis.(b) Analysis by SDS-PAGE.

Content: The protein was lyophilized from a concentrated (0.65mg/ml) solution with 0.003mM NaHCO3.

Lyophilized Leptin Antagonist Triple Mutant Ovine Recombinant although stable at room

temperature for several weeks, should be stored desiccated below -18°C. Upon reconstitution at > 0.1 Len-tA mutant mg/ml and up to 2 mM and filter sterilization Lentin mutant can be stored at 4°C.

Storage condition:

0.1 Lep-tA mutant mg/ml and up to 2 mM and filter sterilization Leptin mutant can be stored at 4°C or even room temperature for several weeks making it suitable for long term infusion studies using

osmotic pumps. At lower concentration addition of a carrier protein (0.1% HSA or BSA) is

suggested. Please prevent freeze-thaw cycles.

Amino Acid: The sequence of the first five N-terminal amino acids was determined and was found to be Ala-Val-

Pro-Ile-Arg.

Application Note

It is recommended to reconstitute the lyophilized Leptin-Antagonist Triple Mutant Ovine Recombinant in sterile water or sterile 0.4% NaHCO3adjusted to pH 8, not less than 100µg/ml, which can then be further diluted to other aqueous solutions. The Leptin-Antagonist Triple Mutant Ovine Recombinant is capable of inhibiting leptin-induced proliferation of BAF/3 cells stably transfected with the long form of mouse leptin receptor. It also inhibits various leptin effects in several in vitro bioassays.
