36-3015: Monoclonal Antibody to Insulin (Clone: 2D11-H5)

Clonality: Monoclonal Clone Name: 2D11-H5 Application: FACS.IF.IHC Reactivity: Human Gene: INS Gene ID: 3630 **Uniprot ID:** P01308 Format: Purified **Alternative Name:** INS

Isotype: Mouse IgG1, kappa

Immunogen Information: Human insulin conjugated to BSA was used as immunogen to generate the insulin antibody.

Description

Insulin is a secreted peptide hormone produced by the pancreas that regulates carbohydrate and lipid metabolism. Insulin is released from the pancreatic beta cells of the islets of Langerhans in response to secretagogues. Following its release, insulin quickly acts to both inhibit hepatic glucose production and stimulate peripheral blood glucose utilization. During this process cells in the liver, muscle, and fat are triggered to take up glucose and store it as glycogen, resulting in a decrease of blood glucose levels.

Product Info

Amount: 100 μg

Purification: Protein G Chromatography

Content: 25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium

azide is highly toxic.

Storage condition:

Storage condition:

Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

Flow Cytometry (1-2ug/million cells); Immunofluorescence (1-2ug/ml); Immunohistochemistry (Formalin-fixed) (0.1-0.2ug/ml for 30 minutes at RT)(No special pretreatment is required for staining of formalin/paraffin tissues.)
