## 10-1044: Monoclonal antibody to Bi-1 (Clone: ABM20E4)

Clonality: Monoclonal
Clone Name: ABM20E4

Application: WB
Reactivity: Human
Gene: TMBIM6
Gene ID: 7009
Uniprot ID: P55061
Format: Purified

Alternative Name: TMBIM6,BI1,TEGT Isotype: Mouse IgG2a Kappa

Immunogen Information: A partial length recombinant protein of human Bi-1 (amino acids 1-200) was used as an

immunogen for this antibody.

## **Description**

Bi-1 is an anti-apoptotic protein that inhibits Bax activation and its translocation to the mitochondria. Functionally, Bl-1 affects the leakage of Ca2+ ions from the ER. In addition to its anti-apoptotic role, Bl-1 also enhances cancer/tumor progression. It belongs to the Bcl-2 family, plays an important role in the mitochondrial apoptosis pathway. Bi-1 over-expression suppresses apoptosis induced by Bax, staurosporine and growth factor deprivation. Bl-1 is presumably not needed for the physiological regulation of developmental programmed cell death. The anti-apoptotic mechanism of Bl-1 involves the suppression of Bax activation and translocation to mitochondria, preserving the mitochondria membrane potential and mitochondrial morphology, and preventing the activation of post-mitochondrial caspases. Bl-1 function is also associated with the regulation of intracellular Ca2+ omeostasis. In several human cancers, including nasopharyngeal carcinoma, its expression was found to be increased; however, up-regulated expression of this protein has been linked to increased cell proliferations.

## **Product Info**

**Amount :** 25 μg / 100 μg

Purification: Protein G Chromatography

Content: 25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium

azide is highly toxic.

Storage condition:

Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles.

## **Application Note**

Western blot analysis: 4-6 µg/ml
